## Sumitomo Metal Mining Integrated Report 2021 Now Published

**A focus on resolution of social issues through business and on  
content of interest to stakeholders**

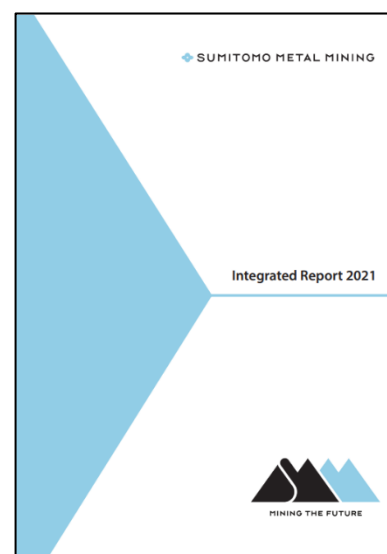

Sumitomo Metal Mining Co., Ltd. (Head office: Minato-ku, Tokyo, President and Representative Director: Akira Nozaki) has published its “Sumitomo Metal Mining Integrated Report 2021” (English version).

This is our sixth Integrated Report since 2016. It goes into detail on the SMM group’s value creation and how it relates to efforts to further intertwine sustainability and business, to the risks and opportunities surrounding our business, to our competitiveness and the value we offer, and to our business model and strategy.

Through this report, we hope to garner even further understanding from all of our stakeholders inside and outside of the company with regard to the initiatives we are undertaking towards our group’s goal of achieving sustainable growth and maximizing corporate value. We also hope to use this report as a means of engagement with our stakeholders.

Sumitomo Metal Mining Integrated Report 2021 Cover

### ■ Main Features of the Integrated Report 2021

- 1) Clarification of the characteristics of the SMM Group value creation process  
We further quantify and explain the details of each process behind the mechanisms that produce the SMM Group’s own unique value creation.
- 2) Special feature “Automobile Electrification Accelerates toward a Decarbonized Society”  
We explain the development of our xEV secondary battery cathode material business, which is making the most of a collaborative effort between three of our businesses: resource, smelting and refining, and materials. Then, we go into the strengths of this three-business collaboration.
- 3) Progress of the SMM Group’s material issues from the Vision for 2030  
We go over the progress we’ve made in each of the 11 material issues in our Vision for 2030 over the last year, including their KPIs.
- 4) Separate volume for detailed data related to sustainability  
We compile selected data into a separate volume called “ESG Data Book 2021,” just as we did last year. We’re trying to maintain the quality and amount of data we disclose, while keeping it easy to read.
