

## 2024 Water Accounting

| Metric                                            | Source/Destination/Type      | Volume of Water by Quality <sup>※1</sup> |                |                |
|---------------------------------------------------|------------------------------|------------------------------------------|----------------|----------------|
|                                                   |                              | High(ML)                                 | Low(ML)        | Total(ML)      |
| Operational water Withdrawal                      | Surface Water                | 14,261                                   | 0              | 14,261         |
|                                                   | Groundwater                  | 7,535                                    | 8              | 7,543          |
|                                                   | Seawater                     | 0                                        | 158,037        | 158,037        |
|                                                   | Third Party Water            | 13,832                                   | 0              | 13,832         |
|                                                   | Produced water <sup>※2</sup> | 0                                        | 2,837          | 2,837          |
|                                                   | <b>Total</b>                 | <b>35,628</b>                            | <b>160,882</b> | <b>196,510</b> |
| Other Managed Water(OMW) <sup>※3</sup> withdrawal |                              | 0                                        | 7,588          | 7,588          |
| Total Discharge                                   | Surface Water                | 5,722                                    | 0              | 5,722          |
|                                                   | Groundwater                  | 0                                        | 0              | 0              |
|                                                   | Seawater                     | 29,009                                   | 162,037        | 191,046        |
|                                                   | Third Party Water            | 61                                       | 1,650          | 1,711          |
|                                                   | <b>Total</b>                 | <b>34,792</b>                            | <b>163,687</b> | <b>198,479</b> |
| Total Consumption <sup>※4</sup>                   |                              |                                          |                | 5,619          |
| Operational water Reuse/recycle                   |                              |                                          |                | 17,725         |

※1 Water Quality : Water quality is based on ICMM water quality categories

※2 Produced water : Water that enters an organisation's boundary as a result of use of any raw material, and has to consequently be managed by the organization.

※3 Other Managed Water(OMW) : Water that is actively managed (eg physically pumped, actively treated or has material consumptive losses) without intent to supply the operational water demand.

※4 Total consumption : Total consumption = (Operational water withdrawal + OMW withdrawal) - total discharge
